### Appliance Recycling Centers of America Reports Strong Second Quarter Results

**Minneapolis, MN—August 1, 2007**— Appliance Recycling Centers of America, Inc. (Nasdaq: ARCI) today reported sales of \$22,582,000 for the second quarter of 2007 ended June 30, an increase of 18% from \$19,161,000 in the year-earlier period. ARCA reported net income of \$836,000 or \$0.19 per diluted share for this period, a significant improvement from the net loss of \$461,000 or \$0.11 per diluted share in the second quarter of 2006.

Same-store sales of the 13 ApplianceSmart factory outlets that were open during the complete second quarters of 2007 and 2006 increased 3%, while total retail sales rose to \$18,743,000, a 16% increase from the year-earlier level. Second quarter recycling revenues increased 33% to \$3,353,000 from the comparable period of 2006.

Edward R. (Jack) Cameron, President and Chief Executive Officer, commented: “Sales of our ApplianceSmart operation rebounded solidly in this year’s second quarter, with most of our markets posting improved year-over-year growth. Our retail business also benefited from the opening of two additional factory outlets in the Atlanta market during the past year. ApplianceSmart’s sales growth is particularly encouraging in view of the continuation of high gasoline prices and weakness in the housing industry. ApplianceSmart is also realizing improved operating efficiencies, resulting from initiatives aimed at strengthening inventory management and other business systems.”

---

He continued: “The growing interest in the residential energy conservation programs that ARCA has been handling for nearly two decades has translated into two large new programs. During the latter stages of the second quarter, ARCA’s recycling operation started to benefit from the expansion of our recycling contract with the Southern California Public Power Authority (SCPPA) to include the Los Angeles Department of Water and Power. Under this expanded initiative, ARCA expects to replace and recycle 50,000 old, inefficient refrigerators owned by low-income residents in Los Angeles. This program, which began April 30 and runs through December 2008, is expected to generate total revenues of approximately \$25 million. Also as previously reported, ARCA’s Canadian subsidiary, ARCA Canada Inc., received a multi-year appliance recycling contract in June with the Ontario Power Authority (OPA). Started late in the second quarter, this program is expected to generate revenues of up to \$40 million over the three-year life of the program. If this year’s recycling targets for SCPPA and OPA contracts are met, both programs would generate revenues of \$3 to \$4 million over the balance of 2007.”

During the second quarter, ARCA incurred legal costs of approximately \$98,000 related to two previously reported lawsuits involving JACO Environmental, Inc. In one lawsuit, ARCA has charged JACO with engaging in unfair business practices in violation of federal and California laws by committing fraud on the U.S. Patent Office in order to obtain a patent for a refrigerator recycling method that was previously developed by ARCA. This litigation is expected to go to trial later this year. In addition, the United States District Court for the Central District of California dismissed a second lawsuit filed by JACO, together with SEG Basis GmbH and SEG Umwelt-Service GmbH, for lack of prosecution. This dismissed suit alleged that ARCA has been using refrigerator recycling systems and processes invented by SEG and protected by two U.S. patents issued to SEG and exclusively licensed to JACO.

Cameron added: “We believe the third quarter outlook for our ApplianceSmart operation is favorable, although we remain cautious about the potential impact of high fuel prices and the downturn in the housing market. In addition, the SCPPA and OPA programs are expected to have a greater positive impact on our appliance recycling operation during the third quarter.”

#### AboutARCA

ARCA is one of the nation’s largest recyclers of major household appliances for the energy conservation programs of electric utilities. Through its ApplianceSmart operation, ARCA also is

---

one of the nation’s leading retailers of special-buy household appliances, primarily those manufactured by Maytag, GE, Frigidaire and Whirlpool. These special-buy appliances, which include close-outs, factory overruns and scratch-and-dent units, typically are not integrated into the manufacturer’s normal distribution channel. ApplianceSmart sells these virtually new appliances at a discount to full retail, offers a 100% money-back guarantee and provides warranties on parts and labor. As of July 2007, ApplianceSmart was operating 15 factory outlets: five in the Minneapolis/St. Paul market; three in the Columbus, Ohio, market; four in the Atlanta market; two in San Antonio, Texas and one in Los Angeles.

# # #

Statements about ARCA’s outlook are forward-looking and involve risks and uncertainties, including but not limited to: the strength of recycling programs, the growth of appliance retail sales, the speed at which individual retail stores reach profitability, and other factors discussed in the Company’s filings with the Securities and Exchange Commission.
